Thanks Larry. We'll try to make the 23rd work. Let me check with folks here and get back to you. Are you suggesting that we not speak with the state until the feasibility study on excavation is completed this summer? If memory serves me, that was one of the action items (I'm on my phone and can't see the attachment at the moment). I am very concerned that we may lose our window of opportunity to engage meaningfully with the state - which has control over the majority of the funds available to remediate the site.

Ignacio,

I do not think moving the March 23<sup>rd</sup> meeting to an earlier date is going to work for the Tribe because staff and I are at different meetings and will be difficult to coordinate. I would prefer to keep the original date in order for Anthony Greenwater to develop a list of participants and an agreed upon agenda and to facilitate the meeting. I know he is away until the 21<sup>st</sup>, so he will have his work cut out for him when he gets back. Also, any future discussions with Wisconsin DNR should not occur until the agreed upon action items associated with 2/23/17 meeting have been completed by EPA and the Tribe (See Attached file).

Thanks

Larry Wawronowicz
